

Giulia Villa

MSc Student, Human-Centred Artificial Intelligence · DTU

Kgs. Lyngby, Denmark · +39 366 524 3430 · giuliyvilla@gmail.com · linkedin.com/in/giulia-villa2203
Available 15–20 h/week, on site · Can start immediately · EU citizen — CPR & tax card in place

PROFILE

I'm an MSc student in Human-Centred AI at DTU, and what interests me most is how people actually end up using AI, not just how it's built. My bachelor covered that side directly, with some courses like AI and Society, AI and Marketing, Cognitive Psychology, and this semester I'm currently taking UX Design & Prototyping in Figma and Applied AI for Entrepreneurs. For two years I taught Python and C++ to students starting from zero, so explaining technical things to people without that background is familiar ground. I moved to Denmark to study and I want to build my career here. I live in Kgs. Lyngby, a few minutes from Virum.

EXPERIENCE

Private Tutor — Python, C++, HTML 2024 – 2026

Self-employed — Milan, Italy

- Taught programming fundamentals to high-school and university students with no prior technical background, adapting each explanation to the individual's level.

Event Host 2025 – 2026

Savoir Events; Rial Events — Milan, Italy

- Front-of-house at corporate and private events: welcoming and guiding guests, registration desk, on-site support

Social media & content support 2025 – 2026

Punto Scarpe — Bergamo, Italy

- Created posts and visual content for a small business; managed the Instagram profile.

EDUCATION

MSc, Human-Centred Artificial Intelligence Sep 2026 – Jun 2028 (expected)

Technical University of Denmark (DTU) — Kgs. Lyngby, Denmark

- Focus areas: human-AI interaction, responsible AI, machine learning, sustainability.

MSc coursework, Artificial Intelligence and Systems Dec 2025 – Aug 2026

University of Trento — Trento, Italy

- Computer Vision · Signal, Image and Video Processing · Law and Ethics for AI

BSc, Artificial Intelligence Oct 2022 – Dec 2025

Joint programme: University of Pavia, University of Milano-Bicocca, University of Milan — Italy

- Final grade: 106/110 (Italian scale, max 110)
- **Key courses:** AI and Marketing · AI and Society · Cognitive Psychology · Data Mining · Machine Learning · Deep Learning · Natural Language Processing · Human-System Interaction · Ethics and Law for AI

SELECTED PROJECTS

Explainable AI for Risk Detection Python, XGBoost, SHAP

- Built a risk classification pipeline on behavioural data, using SHAP to make individual predictions interpretable for non-technical stakeholders
- Addressed regulatory aspects (MDR Class IIa, GDPR) and designed the system as a human-supervised decision-support tool

Cold Diffusion for Image Restoration PyTorch, U-Net — Bachelor thesis

- Implemented deterministic diffusion for image restoration and benchmarked reconstruction quality (PSNR) on CelebA and CIFAR-10

Further projects in computer vision, multimodal deep learning and clinical machine learning available on request.

SKILLS

Communication: written and visual content creation · explaining technical concepts to non-specialists · teaching and public-facing work

Design & tools: Figma · Microsoft Office (Word, Excel, PowerPoint) · LaTeX

AI tools: daily user of ChatGPT and Claude · currently exploring Microsoft 365 Copilot

Technical: Python (advanced), C++, SQL, R, MATLAB, HTML · PyTorch, TensorFlow, scikit-learn · explainable AI (SHAP), computer vision, data mining

LANGUAGES

Italian (native) · English C1 — IELTS 7.0 · Danish (beginner, taking classes) · German A2 · French A2
